SUMMARY

Full-stack developer with two production platforms in active use: ALLIN, a legal-tech platform for insolvency administrators (freelance client work), and ABC MATE Junior, a live e-commerce site. Strong Python backend foundation with hands-on AI integration in real products: LLM APIs, spaCy NER, and vision models.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend: FastAPI, Django, DRF, Celery, Redis, SQLAlchemy, Alembic, PostgreSQL

Frontend: Next.js, React, Angular, TailwindCSS

AI/ML: LLM APIs (Google Gemini, DeepSeek), HuggingFace Transformers, spaCy NER, PyTorch, Fashion-CLIP, YOLO

Infra/Tools: Docker, Git, Nginx, Gunicorn, Caddy, Cloudflare, GitHub Actions, Sentry

Testing: pytest, pytest-asyncio, Vitest, Playwright

EXPERIENCE

Full-Stack Developer (Freelance) — ALLIN, AI Legal Intelligence Network 2024 – Present

- Built and shipped a legal-tech platform (ailinnetwork.com) used by insolvency administrators to manage cases, documents, and billing end-to-end
- Developed the FastAPI backend with async SQLAlchemy, Alembic migrations, PostgreSQL, and OWNER/ADMIN role-based access
- Implemented a spaCy NER pipeline (ORG/PER extraction, pytest-tested) and hybrid regex + AI template field detection
- Built a template-to-HTML-to-PDF document pipeline (WeasyPrint) and a penalty interest calculator (Civil Code Art. 619, Republic of Moldova) with multi-invoice batch export to PDF/XLSX
- Integrated the BNS statistics API with two-tier local caching; deployed with Docker Compose and Caddy

PROJECTS

ABC MATE Junior — E-commerce for Teaching Materials Aug 2026 – Present | abcmatejunior.com

- Built, deployed, and operate a live e-commerce platform selling digital teaching materials to teachers in Moldova (Django 5/DRF, PostgreSQL 16, React 18/Vite)
- Hardened authentication and payments (rate-limited admin auth, CSRF, session timeouts) with fail2ban and Sentry monitoring; GDPR-aware data handling
- Deployed on a Hetzner VPS with Docker Compose and Caddy HTTPS; GitHub Actions CI with Playwright end-to-end tests on the purchase flow

LISTIT — Marketplace for Social-Media Sellers Jul 2026 | source available on request

- Built a marketplace MVP for Instagram/TikTok sellers: verified storefronts, product variants with stock, global search, checkout, ratings, and a commission ledger
- Backend Django/DRF with Celery/Redis async tasks, S3-compatible media storage, and pytest; frontend React 19, TypeScript, Vite, TailwindCSS with Vitest coverage; Dockerized with Sentry

Fitterz — AI Virtual Wardrobe Jun 2026 | GitHub

- Rebuilt a university thesis into a containerized virtual wardrobe app (source available on request)
- Built a two-stage vision pipeline: Gemini 2.5 Flash clothing classification with Fashion-CLIP zero-shot fallback; YOLO-Fashionpedia detections deduplicated by IoU; weather-aware outfits from Open-Meteo served via Celery/Redis workers
- Shipped a 5-service Docker Compose stack (Django 4.2/DRF, PostgreSQL, Angular 21 + Tailwind PWA) with GitHub Actions CI and JWT httpOnly auth

EDUCATION

BSc Computer Science — Ovidius University of Constanța 2023 – 2026
